

**The following are a few of the wide range of services we can offer you**

<b><i>Orthopaedic &amp; Spinal surgery:</i></b>	
<b>Tibial Plateau Levelling Osteotomy (TPLO)</b>	Used for the treatment of cranial cruciate ligament rupture; a procedure favoured for large and active dogs with a steep tibial plateau angle.
<b>Myelography &amp; Spinal surgery</b>	Ventral Slot (for cervical spine intervertebral disc disease). Laminectomies (hemi & mini for the treatment of thoracolumbar spinal cord compression), and Dorsal laminectomies for Lumbosacral disease.
<b>Complex and simple fracture fixation</b>	Limbs, Pelvis & Vertebrae. AO/ASIF plating, plate/rod, IMEX external skeletal fixation (including complex, hybrid & circular).
<b>Multiple complex injury cases</b>	Combinations of orthopaedic and soft tissue injuries such distal limb degloving and tissue loss.
<b>Developmental Orthopaedic Disease</b>	Elbow dysplasia (e.g. fragmented Medial Cornoid process), OCD lesions etc.
<b><i>Soft Tissue surgery:</i></b>	
<b>Skin grafting and axial pattern flap, skin reconstruction</b>	
<b>Oncological surgery and skin reconstruction +/- Chemotherapy</b>	
<b>Total Ear Canal Ablation &amp; Lateral Bulla Osteotomy (TECA &amp; LBO)</b>	
<b>Thoracic investigation and surgery (including diaphragmatic hernias)</b>	
<b>Urogenital, abdominal and perineal surgery of all types</b>	
<b>Investigation and treatment of single extra-hepatic porto-systemic shunts</b>
